I live in area where country music is not available. As an avid fan (amongst many others) of such music, I purchased satellite radio so I could enjoy music of MY choice. I also purchased satellite radio for my parents who enjoy such music as the 40's, the 50's, and various other "old time" radio - things just not available on the AM/FM dials. Should we be forced to listen to the radio which plays rap, hip-hop, techno, etc. - music, while found to be popular, is deemed offensive and distasteful to our ears. Where is MY right to be able to listen to music of MY choice??
